PROFESSIONAL SUMMARY

Set Up & Manufacturing Technician (NOC 22302) with 20+ years of experience in plastic processing, extrusion, molding, and advanced manufacturing operations. Expert in equipment set-up, process optimization, troubleshooting, and parameter control for thermoplastic materials. Strong background in Lean Manufacturing, TPM, preventive maintenance, and quality systems. Proven ability to reduce downtime, stabilize processes, and improve product performance in high-volume production environments. Seeking technical roles where hands-on expertise in polymer processing and manufacturing reliability can add immediate value.

CORE COMPETENCIES

- Equipment Set-Up & Changeovers
- Manufacturing Process Optimization
- Plastic Extrusion, Injection Molding – Polymer Processing (PE, PP, PVC, TR, TPU, ABS)
- Troubleshooting & Root Cause Analysis
- Lean Manufacturing & TPM
- Preventive & Predictive Maintenance
- Quality Control & Documentation
- Safety Compliance & SOPs
- Cross-Functional Collaboration

EDUCATION & CERTIFICATIONS

- **Bachelor's degree in industrial engineering**, Universidad de La Salle Bajío, León, Mexico
- **Lean Six Sigma Yellow Belt**, Greenbox Institute, Jun- 2024
- **Diploma in Data Analytics**, In Progress

PROFESSIONAL EXPERIENCE

Set Up & Manufacturing Operator Technician — Masternet Ltd., Mississauga, ON

Oct 2020 – Feb 2026

- Executed full machine set-up processes including tooling, downstream equipment, and material control for plastic extrusion lines. Started up, operated, and inspected extrusion processes to ensure consistent product quality and compliance with specifications
- Troubleshoot, repaired, and maintained extrusion machinery, reducing unplanned downtime by 15% and improving equipment reliability.
- Implemented preventive and predictive maintenance strategies, extending machine lifespan and stabilizing production schedules.

- Developed a spare parts management system that lowered inventory costs by 10% while ensuring critical component availability.
- Completed production reporting, scrap analysis, and downtime documentation to support continuous improvement initiatives.
- Led continuous efforts to improve product quality, introducing process adjustments that reduced defects and enhanced customer satisfaction.
- Promoted a safe and healthy workplace by adhering to company safety rules and training operators in best practices.

Senior Operations Manager — Productora y Distribuidora Gastronómica, Mexico City

May 2020 – Oct 2020

- Increased operational efficiency by **12%** through workflow redesign and Lean tools.
- Reduced ingredient waste by **8%** via process standardization and improved forecasting.
- Led production, logistics, and procurement for a high-volume food manufacturing operation.
- Implemented continuous improvement initiatives to streamline processes and reduce costs.

Owner/General Manager — Industria y Operadora de Curtidos, León, Mexico

Apr 2018 – May 2020

- Implemented new tanning and finishing techniques that improved product consistency and reduced chemical consumption by 15%.
- Established and managed a mid-sized tannery operation, coordinating production of leather materials for footwear and upholstery markets.
- Negotiated supplier contracts and client agreements, expanding customer base into regional export markets.
- Developed workforce training programs to upskill operators in safety, environmental compliance, and modern tanning processes.
- Oversaw financial planning, procurement, and logistics, ensuring profitability during industry downturns

Plant Manager — Suelas y Plásticos JB SA de CV, León, Mexico

Jan 2001 – Apr 2018

- Directed **100+ employees** across three shifts, overseeing production, quality, and logistics.
- Increased plant output by **20%** through process redesign and equipment upgrades.
- Reduced waste and improved efficiency through Lean Manufacturing initiatives.
- Increased plant output from **1,200 pairs per day to 3,500 pairs per day** through process redesign and equipment upgrades
- Led cross-functional teams in planning, design, implementation, and continuous improvement.
- Ensured compliance with safety, quality, and operational standards while optimizing resource utilization.
